OBJECTIVE

Seeking a challenging role in a forward-thinking company to apply unique experience in designing and managing high-availability cloud systems across multiple platforms.

EXPERIENCE

DevOps Engineer Aug 2024 - Present
Misr Technology Services (MTS)

- Develop and maintain automation scripts and pipelines.
- Oversee the provisioning, scaling, and monitoring of services and apps.
- Integrate security measures into the DevOps pipeline.
- Work closely with software developers to optimize the SDLC.

Wireless Tripleplay Network Engineer Aug 2022 - Aug 2023
Orange Egypt

- Designing and implementing projects.
- Configuring and installing various devices.
- Strong knowledge of data center operations.
- Dealing with Cisco routers and switches, GPON, Juniper MX, IPTV head-end devices and fiber cables.

Maintenance Engineer Jan 2021 - Aug 2022
Aman E-Payment

- Back-end engineer: reviewing technical documentation (tickets) and handling cases.
- Responsible for the Shoubra branch: handling customers against exact deadlines, repair kits.
- Level 3 engineer: dismantling and repairing defective machines.
- Collaborating in teams for sustained excellence.

EDUCATION

9-Month Scholarship - Cloud Architecture & DevOps Oct 2023 - May 2024
ITI (Information Technology Institute), Cairo

- Communication skills
- Business English course
- A lot of technical courses on cloud environments (vSphere, ISM, NSX, AWS, Linux, Bash scripting, etc.)
- Also a lot of courses on DevOps tools (Docker, K8s, Jenkins, Git, Terraform, Prometheus)
- Teamwork

Bachelor of Electronics and Communication Engineering Jan 2015 - Aug 2020
Modern Academy for Engineering and Technology, Cairo

- Graduation project: Smart Project (A+).
- Based on embedded systems.
- The graduation project consists of two parts:
- a stadium and a wireless smart car which is responsible for a lot of jobs.

TECHNICAL SKILLS

Operating Systems

- Linux Administration
- Windows Administration

Scripting Language

- Bash Script
- Python Knowledge

Network

- CCNA

Database

- MySQL

DevOps Tools

- Docker
- Ansible
- K8s Knowledge
- Terraform
- GitHub Actions
- Jenkins

Monitoring Tools

- Prometheus
- Grafana

Infrastructure

- AWS Cloud Foundation
- Microsoft Azure
- vSphere, NSX Products
- OpenStack Knowledge
- Storage ISM

SOFT SKILLS

- Communication skills.
- Passion for learning and self-studying new technologies.
- Teamwork, task reporting skill.

CERTIFICATES

- Red Hat Certified System Administrator (RHCSA).
  Credly Reference

PROJECTS

- Complete CI/CD Web Application Deployment on K8s Cluster -- GitHub
  - Terraform for provisioning infrastructure
  - Ansible for automating the creation of the Kubernetes cluster and joining nodes
  - GitHub Actions for the pipeline (build, test (code coverage, unit tests), deploy)
  - Maven for build & Docker for image build
- AWS Infrastructure Provisioning and Application Deployment using CI/CD GitHub Actions, Terraform, Java Spring Boot, and Docker -- GitHub Link
  - Developed a CRUD application using Java Spring Boot.
  - Implemented secure access patterns to the database using a bastion host.
  - Dockerized the application to streamline deployment.
  - Complete CI/CD pipeline through GitHub Actions.
- Automating the creation and deployment of a Kubernetes cluster on AWS EC2 instances, using Ansible, Terraform, Kubernetes, AWS -- Project GitHub Link
- Kubernetes integration with Prometheus and Grafana: monitors a Kubernetes cluster with Prometheus and Grafana using Helm -- Project GitHub Link
- Led the creation of an OpenStack project, further developing my skills in cloud computing and infrastructure management.
